EDUCATION

Bachelor of Science in Information Technology - Database Systems

Mindanao State University -
Iligan Institute of Technology

2020 - 2024

- Magna Cum Laude (Cumulative GPA: 1.39007)
- Consistent Lister (1st year - 4th year)
- DOST-SEI RA7867 Scholar
- Member of MSU-IIT DOST Scholars' Association
- 4th Year Block Representative of Junior Information Technology Society

SKILLS

Technical Skills

- Programming Languages (PHP, Java, Javascript, Python)
- Full Stack Web Application Development Database Management (MySQL, Firebase)
- Frameworks (Laravel, Django)

Soft Skills

- Teamwork & Adaptability
- Time Management
- Leadership
- Effective Communication
- Critical Thinking & Problem-solving

Certificates/Seminars

- Capacity Building Training (Learn@Fligno & Erudithe)
- Leveraging S&T for Regional Industrial Development: an OROBEST Innovation Webinar
- Blast Off: Zooming through the Endless Horizon of a Scholarly Future
- Sustaining Gains Thru ICT
- Career for Woman in Technology

SUMMARY

A dedicated and detail-oriented graduate with a Bachelor of Science in Information Technology majoring in Database Systems recognized for academic excellence and leadership. Proficient in full-stack development, programming, and database management with hands-on experience from internships and projects. Adept in problem-solving, communication, and teamwork.

WORK EXPERIENCE

Intern, Full Stack Developer

Jan-May 2024

Pixel Digital

4th Floor, Dreamstar Building, Mariano

Badelles corner Zamora Sts. 9200 Iligan City

- Developed a Ticketing Management System, a centralized help desk platform for issue reporting, task organization, and project management.
- Designed and implemented the login page and authentication system.
- Integrated OTP-based user verification for enhanced security before login.
- Worked on the front-end development alongside team members.
- Implemented reset and forgot password functionality.
- Created comprehensive documentation for the system.

PROJECTS

Energy Consumption Management System

Apr-May 2024

- Developed a web application to monitor and manage energy devices in university buildings (MSU-IIT CCS and MICeL), integrating historical data comparison with real-time data from energy meters using Arduino.
- Built using Laravel, MySQL, and JavaScript for efficient data management and visualization.

Resolutions and Issuances Repository System

Dec 2023

- Developed a repository system for MSU-IIT NMPC to store and manage resolutions and issuances.
- Built using Laravel, MySQL, and JavaScript for efficient data storage and retrieval.

Flood Flow Monitoring System

June 2023

- Developed a web application to monitor water levels using a mini simulation.
- Utilized Arduino IDE for sensor data collection and Firebase Firestore for real-time data storage.
- Built the front end using HTML, CSS, and JavaScript for data visualization.
